Subject Index

Libraries

Newton's library. Spargo, P. E. 29.

Astronomy. Surveying

Structure of comets. Vanýsek, V. 60.

Aerial survey of natural resources. Grimes, B. H. and Hubbard, J. 130.

Physics

Major problems of contemporary physics. Segrè, E. 55.

Nuclear magnetic double resonance. Johannesen, R. B. and Coyle, T. D. 10.

Chemistry

Flash thermolysis. Mayo, P. de. 135.

A chromatographic centenary (Editorial). 2.

The chemistry of the carboranes. Haworth, D. T. 16.

Noble-gas compounds. Bartlett, N. 107.

Geophysics. Geology

Biogeochemistry in Canada. Warren, H. V. 46.

The Global Atmospheric Research Programme (Editorial). 54.

Thunderbolts. Hill, R. D. 3.

Potentially exploitable marine minerals. Tooms, J. S. 113.

General Biology

Repair of genetic material in living cells. Hanawalt, P. C. 83.

Clones of antibody-forming cells; natural and experimental selection. Williamson, A. R. 118.

The experimental analysis of drug-dependence. Collier, H. O. J. 123.

Biochemistry

Leghaemoglobin, a plant haemoglobin. Ellfolk, N. 139.

The physiology of the polyamines and related compounds. Smith, T. A. 22.

The cytochalasins as research tools in cytology. Carter, S. B. 77.

Botany

Non-parasitic microbes colonizing green leaves: their form and functions. Last, F. T. and Warren, R. C. 143.

Welwitschia mirabilis: paradox of the Namib Desert. Bornman, C. H. 95.

Phytotrons and phytotronics. Chouard, P., Jacques, R., and Bilderling, N. de 41.

Medicine

The eradication of malaria (Editorial). 106.

Nuclear Engineering

The high flux reactor at the *Institut Laue-Langevin*. Ageron, P. 67.

Computer Applications

Magnetic mapping of buried archaeological sites. Scollar, I. 34.

Digital computers and image processing. Andrews, H. C. 88.

History of Science

Franciscus Sylvius and his Iatrochemical School. Underwood, E. Ashworth. 73.
